To Whom It May Concern:

I am writing in regards to your recent letter regarding Case No. 2007-00363 for the construction and operation of a Verizon Wireless Cell Facility to be located at 2181 Stepstone Road, Mount Sterling, KY 40353.

This proposed facility is located adjacent to my property, within a 500' radius. Being a contiguous property owner, I feel that the said proposed facility would not be a good location for this tower. I wish to intervene in this matter for several reasons: the first being that it will obstruct my spectacular view and therefore depreciate the value of my property; second, I feel that there is potential for harmful microwave radioactive waves and radiation that could harm my children and family; third, being aware of these towers, I know that they attract numerous birds and that they are a hindrance to my property and serenity, and a potential health hazard.

A recent new development also located adjacent to my property which includes a McDonald's, Subway and Pilot Truck Stop and Gas Station has raised my property value. Possibly a subdivision or another positive development may also raise my property value at the location where you are proposing the Verizon facility. This tower is not in my best interest as a property owner.

I am not in favor of this proposed facility.

If you would like to discuss this matter further, I can be reached by calling 859-498-3771 or 859-398-1290.

Regards,

Roger Jones
